

Fonda, 10, Castelló d'Empúries, 17486

A new construction project of two single-family houses between in Castelló d'Empúries, distributed on the ground floor, first floor and second floor, with unobstructed views. With an area of 2210 square meters of construction, of which 160 useful square meters. Each house with a living room and open kitchen, 3 bedrooms, 3 bathrooms, 3 other rooms and the garage.

Distribution: Low level; The ground floor is accessed from Carretera Fonda, a garage and the hall with access stairs to the first floor. First floor; Distributed in a living room with integrated kitchen, a bathroom with shower, a storage-laundry room and an office/space open to the living room. Second floor; Distributed in two double bedrooms, a complete bathroom with shower, a suite-type bedroom with complete bathroom with shower and its dressing room. We have all the plans and descriptive memory. For more information, come visit us at our INMO Castelló office in Castelló d'Empúries. Castelló d'Empúries has a great historical medieval importance to this region. This is reflected in its lay out- narrow, cobbled streets, village squares and monumental buildings such as the basilica of Santa Maria (better known as The Cathedral of The Emporda), The Old Bridge, The prison (not in use!) The monastery (now converted in to The Museum of Medieval History), the public wash house (also not in use!) the Flour Museum. Adjacent to Castelló d'Empúries is the largest residential marina in Europe- Empuriabrava. Empuriabrava is built around 23 kms of navigable canals, has 5000 moorings, port, two km magnificent beach and airclub.
